Description

FEATURES:

- Fully Welded Frame: The Triton difference - all-aluminum, fully welded frame provides a solid structure for years of loading and unloading. Custom extrusions and robust 2" x 3" frame with scallop design provides added strength.
- Tongue Jack and Ratchet Straps: Standard on LTWCI-X, LTWCI-TX, LTWCII-X models only. 1000# swivel wheel tongue jack with 10" up/down travel helps you easily move the trailer into position. Rear ratchet straps secure machines and retract when not in use. (2 straps per machine).
- Designed To Fit All Watercraft Models: Adjustable 6' bunks and Infinite Slide Adjust (ISA) bow stop allow for proper fit of any personal watercraft, from one-seat to three-seat models.
- Adjustable Bunks: 6' bunks can slide from left to right to properly accommodate the craft hull. Bunks can also be angled to perfectly cradle the craft.
- Tie Downs: Welded aluminum tie downs provide multiple points to secure crafts. LTWCI, LTWCI-X models have tie downs.
- Spring Axle: LT Series models are standard with single spring axle
- Sealed LED Lights: Sealed lights and wiring harnesses throughout trailer resist corrosion caused by moisture.
- Keel Guard: Non-marring, UV-resistant keel guard is positioned at a potential impact area to shield the craft.

ACCESSORIES:
